

1. WhatsApp Chat Backup

- Open WhatsApp → Settings → Chats → Chat backup.
- Select the Google Account used for backup and choose a backup frequency.
- Tap Back up to create a current backup.
- Verify the date/time and backup size shown on the Chat backup screen.
- In Google Drive, open Storage/Backups (or the Backups section) to verify that a WhatsApp backup is present.

Last backup: 4 Oct 2026, 10:32 AM

Backup size: 186 MB

Encrypted backup: On

2. Restore Deleted Photos

- Open the phone's Gallery/Photos app and select 3 test images.
- Move/delete the images so they appear in the Recently Deleted or Trash folder.
- Open Recently Deleted/Trash and select the 3 deleted images.
- Tap Restore to recover them to the gallery.
- Open the gallery and verify that all 3 photos are accessible again.

Restore • Delete permanently

3. Automatic Contact Backups

- Open Settings → Google → Backup/Google services and enable contact synchronization with the Google Account.
- Alternatively, open Google Contacts and confirm that the correct Google Account is selected.
- Keep Contacts sync enabled so newly added contacts are synchronized automatically.
- Check Google Contacts after synchronization to verify that the contacts are available from the account.
- For iPhone users, iCloud Contacts can be enabled from Settings → Apple Account → iCloud → Contacts.
